

SPS Health Guidelines 2022-2023

Health and safety are very important at Saint Philip School. It will take the entire school - faculty, parents and students to have a successful year! In order to keep our students in school and actively learning we need to follow these guidelines:

If you are sick - STAY HOME.

If you have ANY symptoms of Covid -19, get tested, even if you think it may be allergies. A rapid Antigen test is acceptable; please email the school nurse with results at agraham@stphilipschool.com.

- If you test positive, stay home and isolate for 5 days. You may return on day 6 wearing a mask until day 10 or you have a negative Antigen test result on both day 6 and 8.
- If you are negative for Covid, stay home and rest and return when symptoms improve.

If a student has a fever, is vomiting or has diarrhea they may NOT come to school. Please keep your child home if they are experiencing these symptoms until they are symptom free for 24 hours without fever reducing medications, anti-nausea and/or antidiarrheal medicine.

If your child was absent, and symptoms have greatly improved, he/she may return to school with a note explaining the illness and the dates your child was absent.

If your child has a rash, keep them home and have the pediatrician check them out. Some rashes are highly contagious and need to be treated.

If your child has been diagnosed with anything by the pediatrician or urgent care office, please inform the school. We cannot keep illnesses from spreading if we do not know what is going around.

Practice good hygiene by washing hands frequently, covering coughs and sneezes and keeping hands out of mouths, noses and off face.

If you have any questions or concerns, please do not hesitate to contact the nurse or office at any time!

Less distractions in the classroom lead to better learning!
